

**Kingston Parish Council 9 November 2022**

**Kingston green infrastructure: update on the Kingston mapping project**

1. The SDNPA have granted funding for the Kingston mapping project, as set out in the attached proposal. The purpose of this project is to produce a simple habitat map for the parish and identify the opportunities for nature recovery projects that could be undertaken in the future. It is hoped to provide more detailed information on how a couple of projects could be taken forward. This is the first step in formulating a community-led plan for nature enhancement and sustainable recovery in the parish.
2. KPC are asked to agree to commission Wild Business to undertake the project as set out in the proposal. Wild Business have extensive experience in this field and can complete the work in the agreed time-frame.
3. Wild Business will feed back progress on the project at regular intervals. It is planned to set up a steering group to liaise with the project. At the end of the project in late spring, it is planned to hold an event for the village at which the project will be presented and support sought for taking forward initiatives identified.
